**Introduction:** The Cayman Islands is a very small country in the Caribbean Sea with a unique history in comparison to other islands in the region. Most people associate the Cayman Islands with banking and beaches, but beneath that visible surface lies a rich cultural and musical heritage! In this video, Center for World Music teaching artist Natasha Kozaily takes students on a journey to her home country, where we explore Cayman Islands history and culture through the music and life of Julia Hydes.

Julia Hydes makes for a fascinating human interest study because of her unique status as the only female drummer in the fraternity of Caymanian folk music, as well as her advanced age; all of the footage of Julia Hydes in this video is from the age of 101. Exposing students to her music and story offers radical insights into how music is made, a woman's role in culture and music, old age, and folk music aesthetics.

The attached activity pack was hand drawn by our teaching artist with the intention that students will print and fill out the pages after watching the video.
